

This load sheet is for both still and film/video usage. Trade terminology might be different to the well informed gaffer. What is listed is what's available. Not all of it can be moved to a location with our 24 ft. trailer: We might have to rent another truck. Unless otherwise specified by you, we try and bring enough of everything for the type of jobs we normally work on.

Chroma is ALL either: EDISON, #15 CAM LOK OR #16 MINI-CAM LOK.

Chroma is NOT: stage pins, mole pins, Bates, twist lock, etc.

Chroma distro boxes are: 120/240 volt, GFCI breakered, Black, Red, White, Green coding

Chroma does run a Blue, three phase, but only to a “threefer” split to the distro boxes.

Chroma is: reversed ground based. We can turn-a-round the neutral if necessary.

Chroma transports equipment in a 24 ft. trailer with a rear ramp.

Chroma will only load the trailer within the weight and balance restrictions. Normally, 5 tons of gear.

Chroma normally travels with equipment in hard or soft carts and cases. They vary from a senior taco cart to wire and cloth hampers on wheels.

ALL OF THE FOLLOWING ARE AVAILABLE FOR OUR DAY RATE EXCEPT WHERE NOTED.

HMI LIGHTS

- 2 LTM, 575 watt, HMI, Cinepar lights with doors, lenses, wire and electronic ballast with 50 ft. header cable each.
- 2 LTM, 1200 watt, HMI, Cinepar lights with doors, lenses, wire and electronic ballast with 15 ft. header cable each.
- 2 LTM and Cinemills, 2500 watt, HMI, Cinepar lights with doors, lenses, wire and electronic ballast with 100 ft. header cable each.
- 2 LTM, 4000/2500 watt, HMI, Cinepar lights with doors, lenses, wire and electronic ballast with 100 foot header cable each.
- 3 Spare electronic ballasts: 575/1200, 2500, 2500/4K.
